DETAILED ACTION

Status of the Claims

1. The Office acknowledges receipt of Applicants Response; dated 17 March 2003, paper number 7. The Examiner further acknowledges the use of the "Revised Amendment Format" with appreciation.
2. Applicant has cancelled claim 1, and amended claims 2-4. New claims 75-87 have been added. Claims 2-87 are pending. Claims 2-6 and 75-87 are examined in the instant action. This application contains claims 7-74 drawn to an invention nonelected with traverse in Paper No. 5. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. All rejections not addressed below have been withdrawn.
5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Double Patenting

6. Claim 2 remains rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,232,527. Although the conflicting claims are not identical, they are not patentably distinct from each other. The recombinant expression cassette of claim 2, comprising DNA encoding the polypeptide of SEQ ID NO: 2, is obvious over the claims of 6,235,972, which are drawn to the same DNA. It would have been obvious to use the DNA in an expression cassette to transform host cells and plants.

Applicant traverses, stating primarily that claim 2 is directed to a recombinant expression cassette which expresses the polypeptide of claim 77 (former claim 1(c)). Therefore the claim is defined by the polypeptide which was restricted out of US 09/426,557 as a separate invention.

Applicant's traversal has been considered and is unpersuasive because claim 2 is drawn to the same DNA, of the same host cell and plant as 09/426,557.

Accordingly this rejection is maintained.

Claim Rejections - 35 USC § 112-first,

Written Description

7. Claims 77-80 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant traverses, stating primarily that evidence submitted in Appendices A and B confirms the identity of the claimed Rad2/FEN-1 sequences.

Applicant's traversal has been considered and is unpersuasive because while Applicant's evidence submitted in Appendices A and B includes alignment with other sequences, how this evidence relates to the claimed percentages sequence identity of the SEQ ID NO: 2 is not clear.

Claim Rejections - 35 USC § 101

8. Claims 3, 75, 82 and 83 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. These claims read on a maize cell that would naturally comprise said polypeptide.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 3-6, 75, 76 and 82-87 are rejected under 35 U.S.C. 102(b) as being anticipated by Baszczynski, et. al., US 5,824,870, issued 20 October 1998.

Baszczynski teaches a nonhuman host cell , a transgenic maize plant (claim 8), and a monocot, comprising a polypeptide having 80, 85, 90, and 95 % identity with SEQ ID NO: 2. Baszczynski also teaches a host cell, a transgenic maize plant and seed (Table 1, column 10)) comprising SEQ ID NO: 2.

Accordingly, Baszczynski anticipates the claimed invention.

Claim Rejections - 35 USC § 112

11. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-6, 76, 84, and 84-87 are rejected under 35 USC § 112.2. These claims are indefinite in that it is unclear of their relationship between the description of the “transgenic” and the fact that the plant comprises the polypeptide. Is it transgenic because it is transformed with a gene that encodes the polypeptide, or it is transformed with another gene?

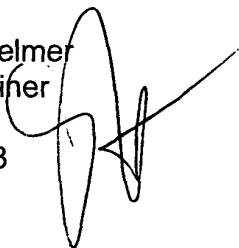

REMARKS

12. Claim 81 is allowable.
